

DChat 安卓手機安裝與權限設定指南

一、安裝前準備

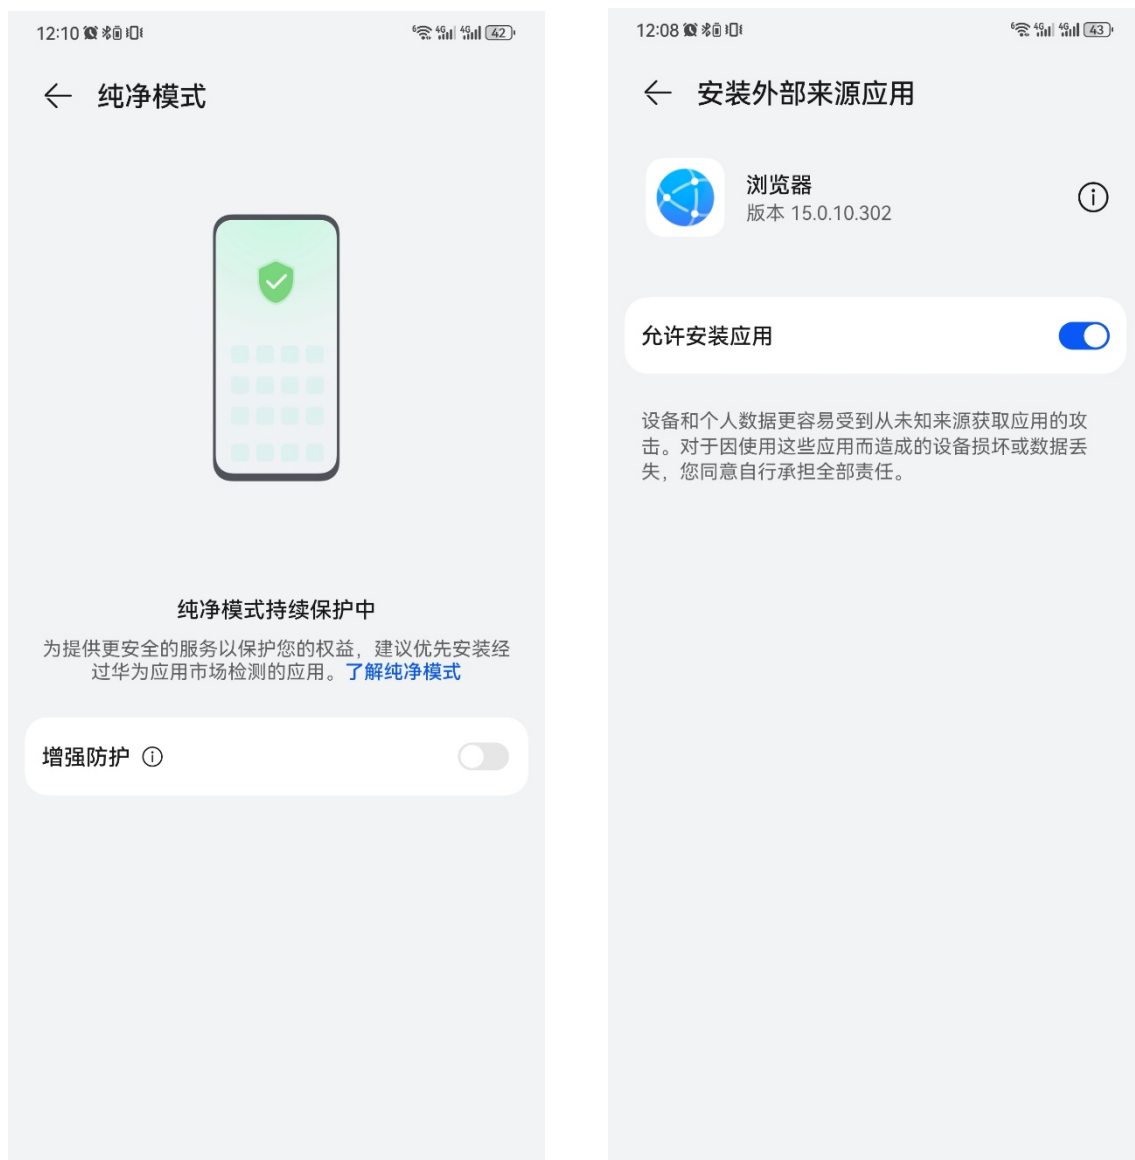

1. 開啟未知來源安裝權限

通用操作路徑：設定 → 安全 / 隱私 → 更多安全設定 → 安裝未知應用 → 選擇瀏覽器、檔案管理員或 WPS 等軟體 → 開啟「允許從此來源安裝」開關。

各大主流手機品牌專屬路徑：

- 華為：設定 > 安全和隱私 > 外部來源應用下載
- 小米：設定 > 隱私保護 > 特殊權限設定 > 安裝未知應用
- OPPO：設定 > 密碼與安全 > 系統安全 > 外部來源應用
- 三星：設定 > 生物辨識與安全性 > 安裝未知應用

（備註：此項設定無需事前手動開啟，可依照安裝時系統彈窗提示直接開啟。）

（以上手機界面為：華為鴻蒙系統）

2. 跳過病毒掃描攔截提示

華為等部分機型安裝時會彈出「惡意應用偵測」警示，於安裝頁面點擊「繼續安裝」或「仍然安裝」即可跳過該提示。

二、DChat APK 安裝檔安裝流程

1. 下載 DChat APK 安裝檔

安裝包需透過傲然技術有限公司官方網站下載，操作步驟：

- 1、登入官網 <https://www.onlyownerhk.com/>，首頁點選「服務與支援」，子分類選擇「DChat 與支援」，點擊圖示旁「了解更多」進入下載頁面。
- 2、於下載頁面右側，依據自身手機作業系統點擊對應安裝包開始下載。
- 3、系統自動彈出安裝視窗，依序點擊：安裝 → 允許本次安裝 → 繼續安裝 → 完成。

（以上手機界面依次為：華為；三星）

風險提示處理方式

1. 安裝彈出「風險應用」警示：直接點擊「繼續安裝」。此為系統針對非官方市集應用的標準警告，不會影響軟體正常運作。
2. 首次開啟軟體提示「偵測到惡意行為」：選擇「信任此應用」或「不再彈出提示」。
3. 出現「解析錯誤」提示：請穩定網路環境下重新下載安裝包，再次嘗試安裝。

三、核心權限設定指南

安裝完畢後，需手動開啟以下權限，軟體完整功能才可正常使用。

1. 基礎功能權限

- 儲存權限：允許 APP 讀寫手機儲存空間，用於檔案傳輸、圖片傳送等功能。

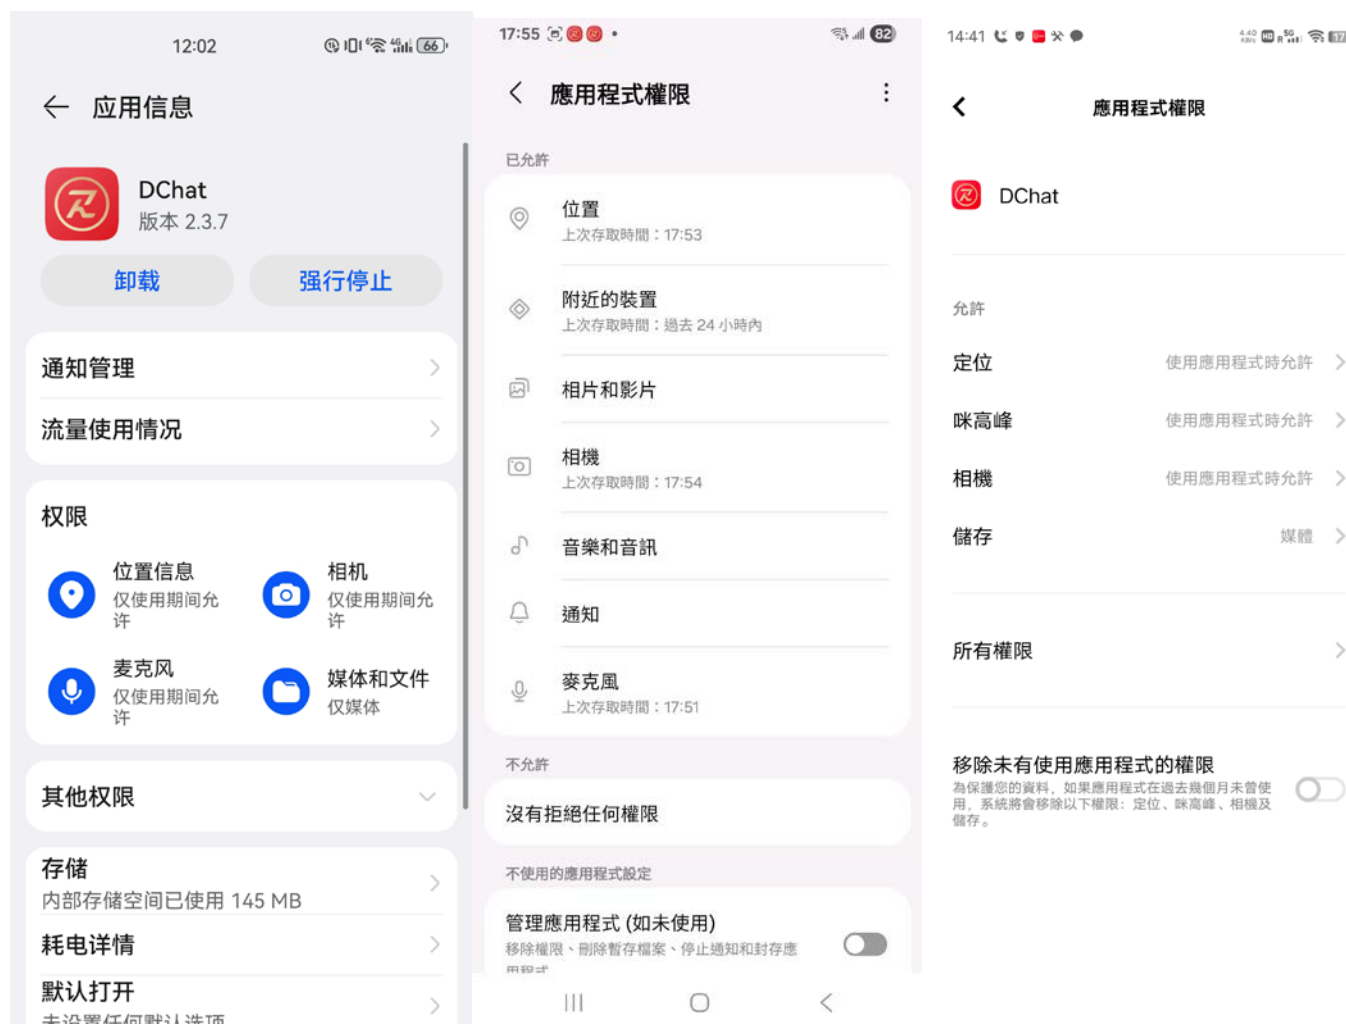

設定路徑：設定 → 應用 → 選取 DChat → 權限 → 儲存 → 開啟

- 麥克風權限：支援語音訊息、語音通話功能。

設定路徑：設定 → 應用 → 選取 DChat → 權限 → 麥克風 → 開啟

- 相機權限：允許拍攝照片、短片並傳送。

設定路徑：設定 → 應用 → 選取 DChat → 權限 → 相機 / 攝影機 → 開啟

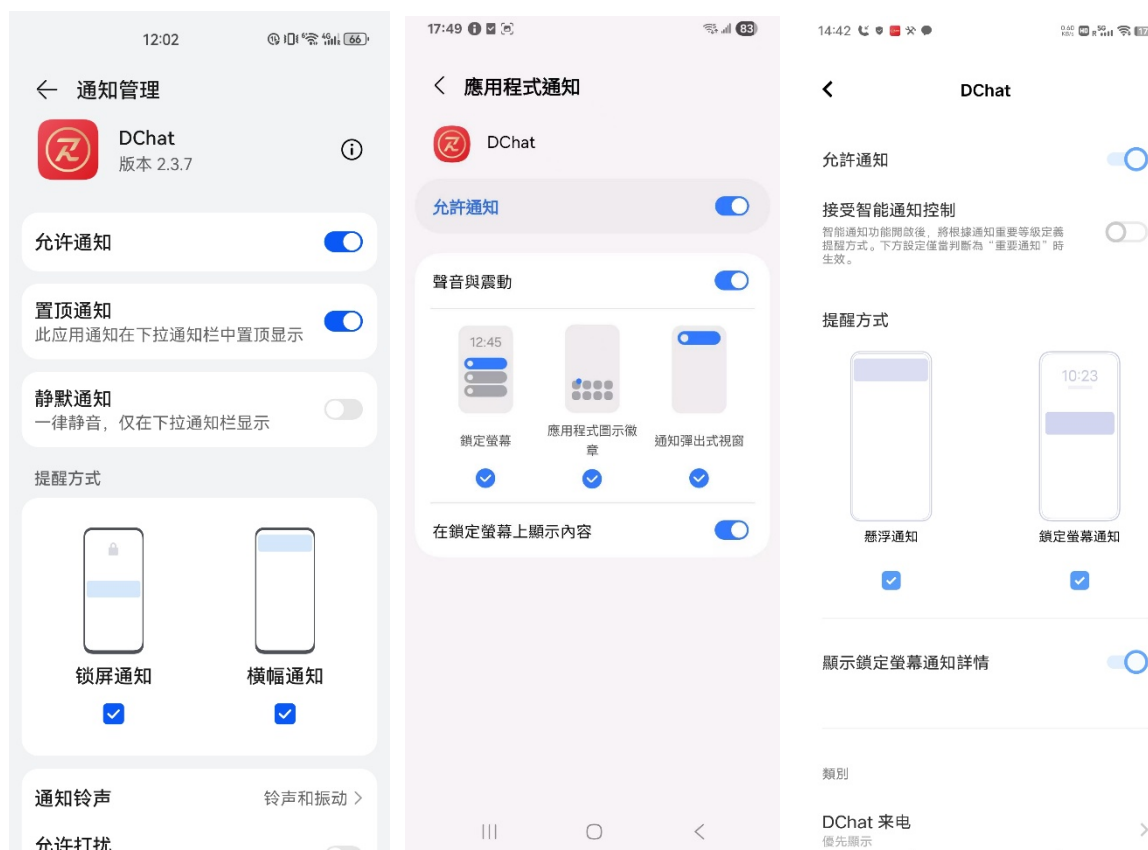

(以上手機界面依次為：華為；三星；VIVO)

2. 進階功能權限

(1) 通知權限——接收新訊息提醒、畫面橫幅推播通知。

設定路徑：設定 → 通知 / 狀態列 → 選取 DChat → 開啟「允許通知」與「橫幅通知」。

（以上手機界面依次為：華為；三星；VIVO）

（2）後台執行權限（忽略電池最佳化）

關閉電池限制，維持 APP 後台穩定執行，即時接收即時通訊訊息。

各品牌專屬設定路徑：

- vivo：設定 → 電池 → 後台高耗電 → 開啟 DChat 開關
- 小米：設定 → 省電與電池 → 應用智慧省電 → DChat → 設定為無限制
- 華為：設定 → 應用 → 應用啟動管理 → 關閉自動管理 → 全數開啟「允許後台活動」

通用路徑：設定 → 電池 → 電池最佳化 → 選取 DChat → 設定為「不最佳化」

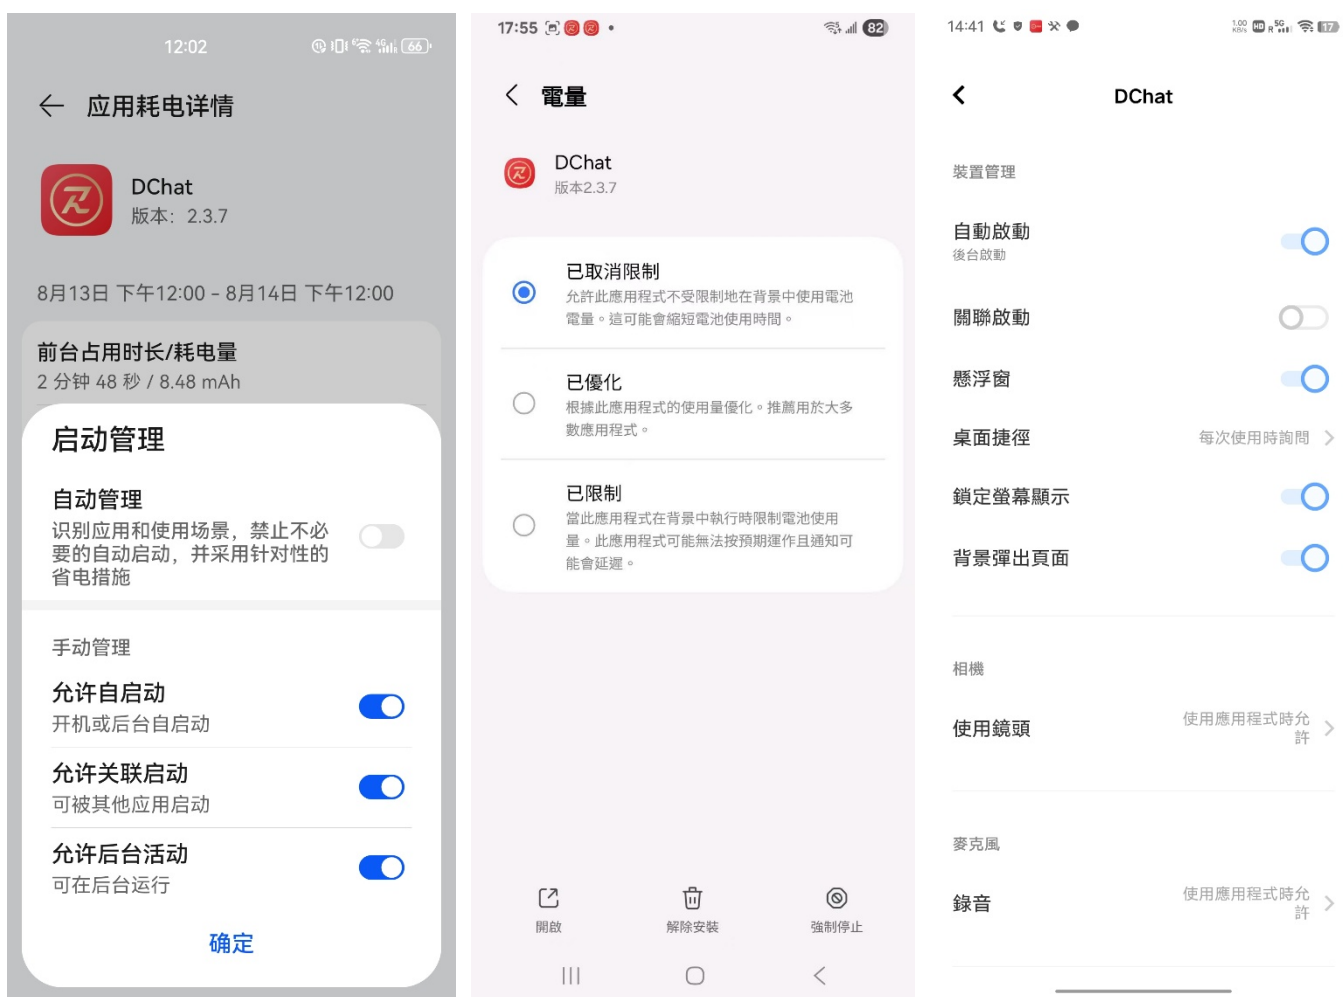

（3）自啟動權限

避免系統自動清除後台程序。

設定路徑：設定 → 應用 → 權限 → 自啟動管理 → 開啟；

或 設定 → 電池 → DChat → 啟動管理 → 手動開啟全部選項。

備註：各廠牌系統文字顯示略有差異，設定目標皆為開啟軟體自啟動、後台執行資格。

（以上手機界面依次為：華為，三星，VIVO）

3. 特殊權限（部分機型適用）

1. 忽略電池最佳化：維持後台穩定執行。

路徑：設定 → 電池 → 電池最佳化 → DChat → 設為「不最佳化」

2. 安全中心白名單：將 DChat 加入信任清單，避免安全軟體誤攔截、強制關閉。

路徑：手機管家 → 病毒掃描 → 隔離區 → 新增信任應用，或關閉風險警示標籤。

四、常見問題與解決方案

1. 安裝失敗

- 提示「儲存空間不足」：清除手機快取、卸載不常用軟體釋放儲存空間。
- 提示「解析錯誤」：確認網路穩定後重新下載 DChat APK 安裝檔。
- 提示「權限不足」：檢查「安裝未知來源應用」權限是否完整開啟。

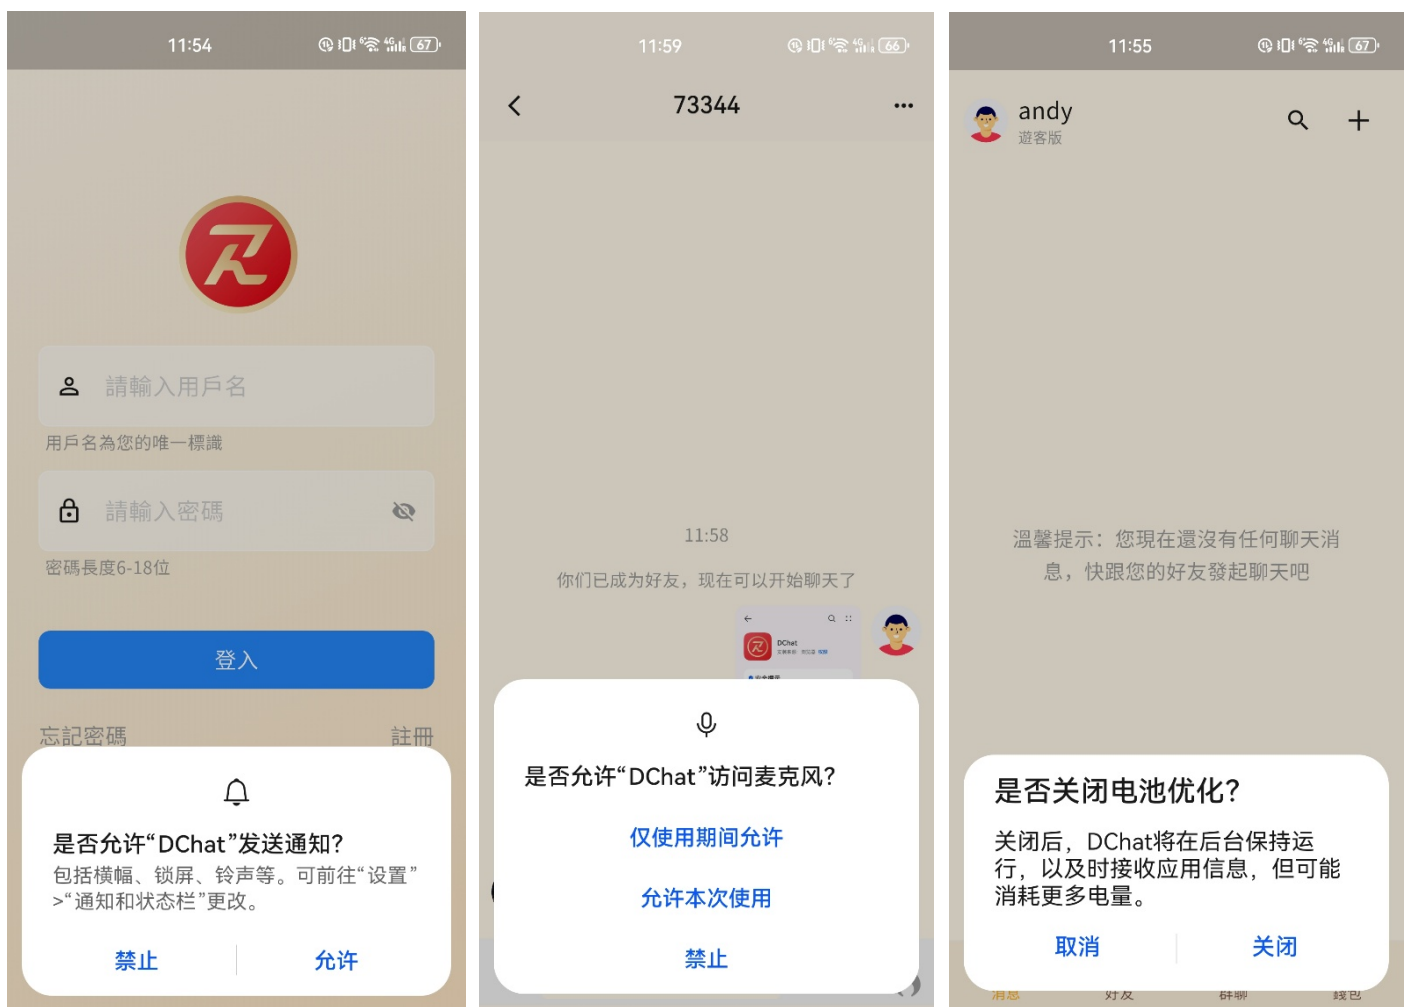

2. 功能異常

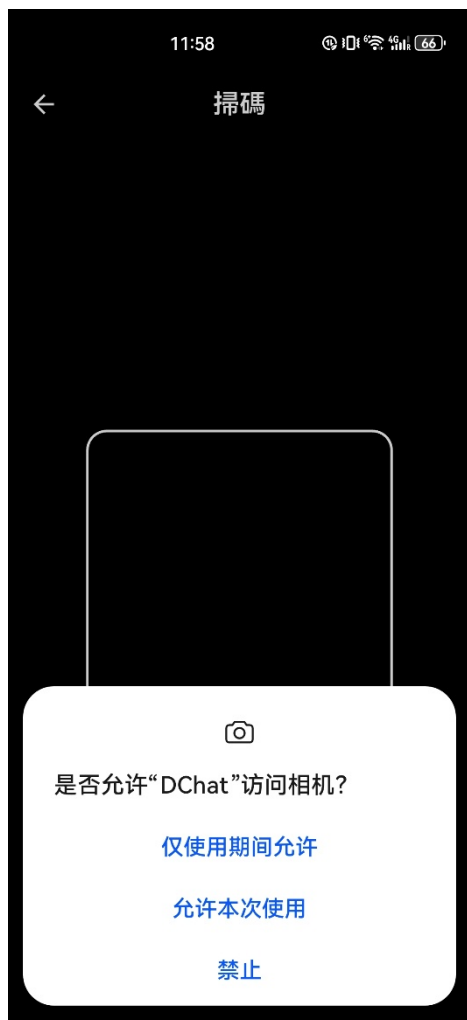

- 無法傳送檔案：確認儲存權限已開啟。
- 語音通話中途斷線：重新設定後台執行權限，並將軟體加入電池最佳化白名單。
- 訊息延遲接收：開啟通知權限，並允許軟體後台持續執行。
- 訊息同步異常：軟體出現「網路連線不順」提示，代表雲端伺服器連線壅塞，可關閉重開 APP 或稍候再使用。

3. 系統安全軟體攔截

若軟體持續被安全中心攔截，可至手機設定關閉「應用安裝偵測」功能。

（以下為主流安卓手機品牌運行時的權限開啟確認界面：包含華為，三星，VIVO，榮耀等）

（軟體使用過程中，相機、麥克風、通知、位置、電池最佳化等權限會透過彈窗詢問，建議全部點選「允許」；若不慎點擊拒絕，可依照第三章節路徑手動開啟對應權限。）

五、問題回饋通道

使用時遇任何異常，可進入 DChat APP 內：「設定」→「關於 DChat」→「協助與回饋」提交問題，供開發團隊收集優化。

六、安全聲明

1. 本軟體版本已完成完整程式碼安全審計，不含惡意程式，無隱私資料外洩風險。

DChat Android Mobile Installation and Permission Setup Guide

1. Pre-installation Preparation

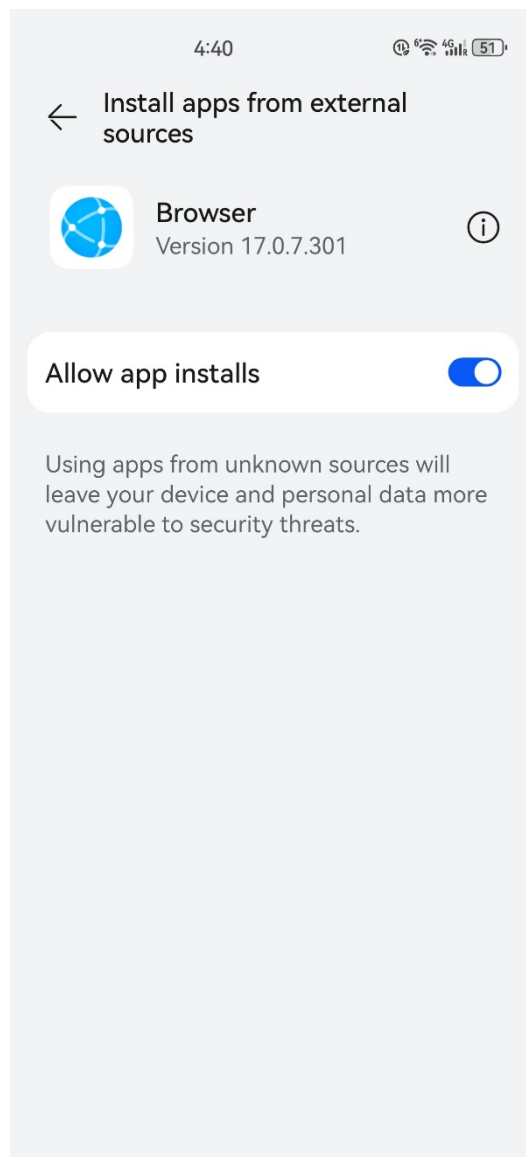

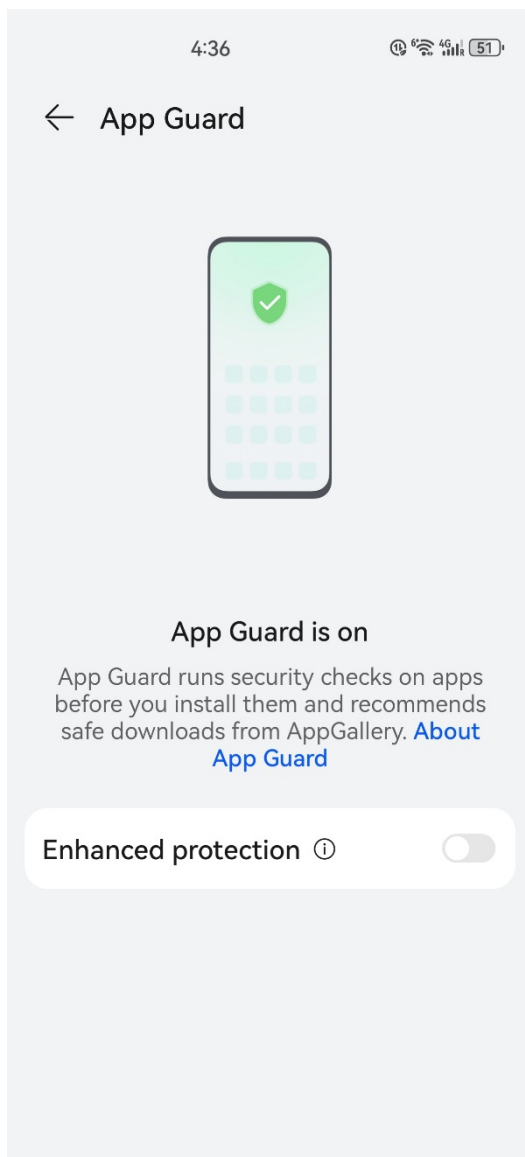

1.1 Enable Installation Permission for Unknown Sources

General path: Settings → Security/Privacy → More Security Settings → Install Unknown Apps → Select browser, file manager, WPS or other apps → Toggle on the switch of "Allow installations from this source".

Brand-specific operation paths:

- Huawei: Settings > Security & Privacy > External Source App Downloads
- Xiaomi: Settings > Privacy Protection > Special Permission Settings > Install Unknown Apps
- OPPO: Settings > Password & Security > System Security > External Source Apps
- Samsung: Settings > Biometrics and Security > Install Unknown Apps

(Note: You do not need to configure this setting in advance; you may enable it directly following the pop-up prompts during installation.)

1.2 Skip Anti-virus Scan Warnings

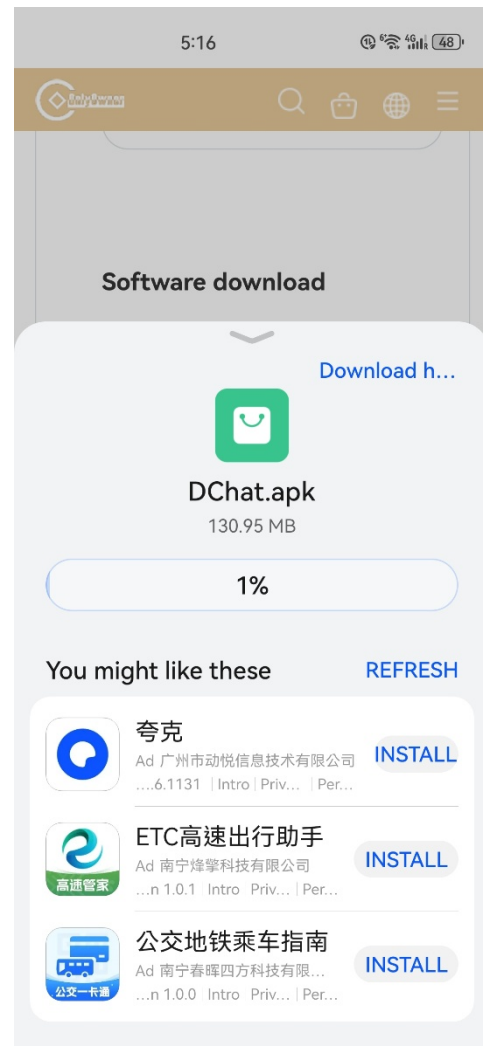

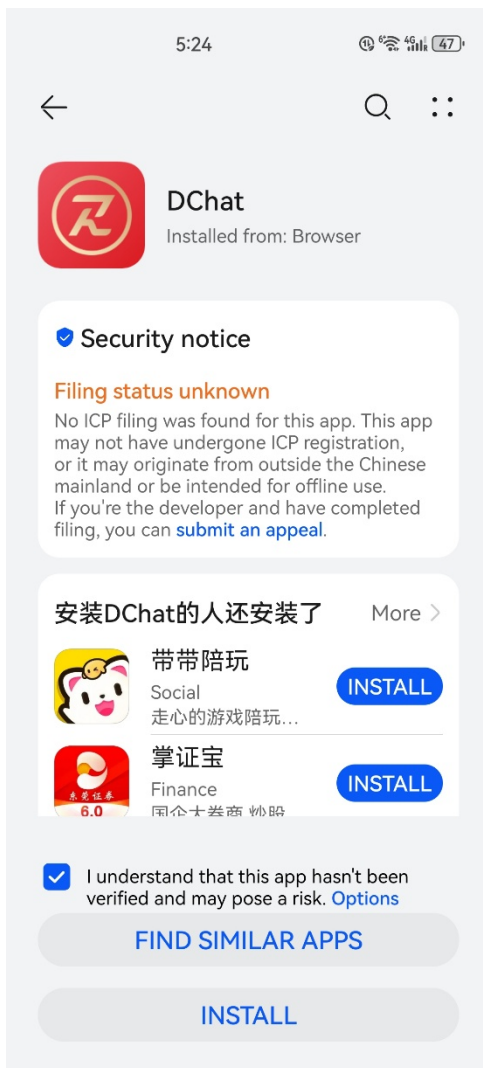

Devices such as Huawei will trigger the "Malicious App Detection" alert during installation. Tap "Continue Installation" or "Install Anyway" on the installation page to skip the prompt.

2. DChat APK Installation Process

2.1 Download DChat APK File

Download the installation package from the official website of OnlyOwner Technology Limited, steps as follows:

- 1、Log on to the official website <https://www.onlyownerhk.com/>, click "Support & Service" on the homepage, select "DChat & Support" from subcategories, tap "Learn More" next to the icon to enter the download page.
- 2、On the right side of the download page, click the corresponding installation package matching your mobile operating system to start downloading.
- 3、The system will pop up the installation window automatically, follow the steps: Install → Allow this installation → Continue Install → Complete.

Handling Risk Warnings

1. Pop-up "Risky App" alert: Tap "Continue Installation". This is a standard system warning for apps outside official app stores and will not affect normal use of the software.
2. "Malicious Behavior Detected" on first launch: Choose "Trust this app" or "Do not remind again".
3. "Parse Error" prompt: Re-download the installation package under stable network connection and retry installation.

3. Core Permission Configuration Guide

After installation, you need to manually enable the following permissions to activate full functions of the app.

3.1 Basic Functional Permissions

- **Storage Permission:** Grant the app read & write access to mobile storage for file transmission, image sending and other features.

Path: Settings → Apps → Select DChat → Permissions → Storage → Toggle ON

- **Microphone Permission:** Support voice messages and voice calls.

Path: Settings → Apps → Select DChat → Permissions → Microphone → Toggle ON

- **Camera Permission:** Allow capturing photos and videos for sending.

Path: Settings → Apps → Select DChat → Permissions → Camera → Toggle ON

3.2 Advanced Functional Permissions

(1) Notification Permission

Receive new message alerts and banner pop-up notifications on screen.

Path: Settings → Notifications/Status Bar → Select DChat → Turn on "Allow Notifications" and "Banner Notifications".

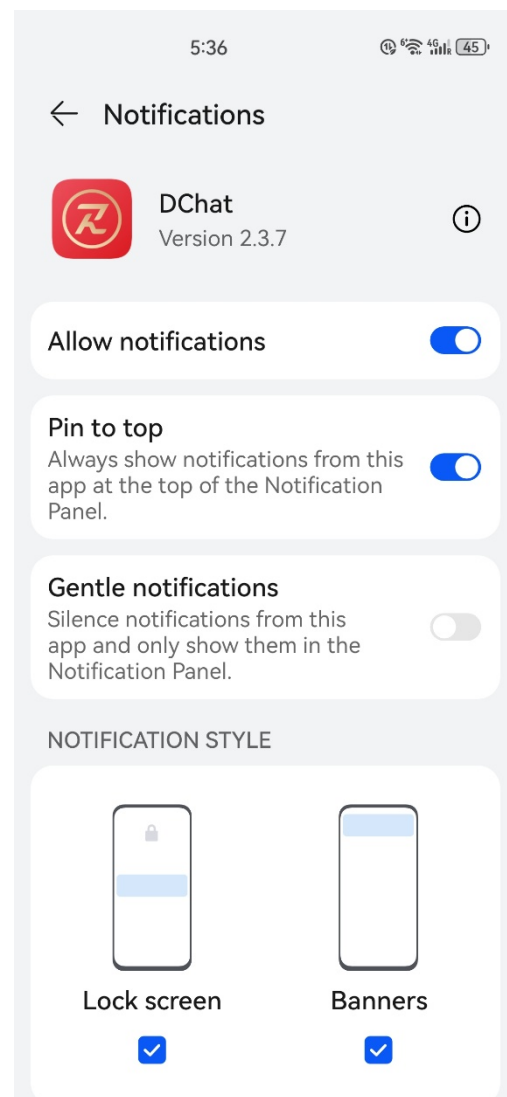

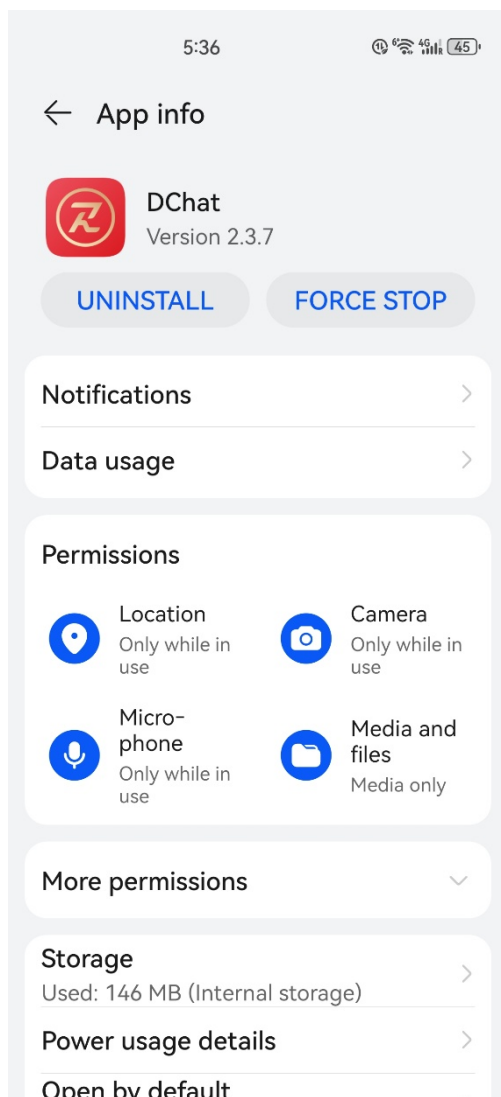

(2) Background Activity Permission (Ignore Battery Optimization)

Disable battery restrictions to stabilize background running and receive instant messages timely.

Brand-specific paths:

- vivo: Settings → Battery → High Power Consumption in Background → Toggle DChat ON
- Xiaomi: Settings → Power Saving & Battery → App Power Saving → DChat → Set to No Restrictions
- Huawei: Settings → Apps → App Startup Management → Turn off Auto Management → Enable all "Allow Background Activity" options

General path: Settings → Battery → Battery Optimization → Select DChat → Set to Not Optimized

(3) Auto-start Permission

Prevent the system from clearing background processes automatically.

Path: Settings → Apps → Permissions → Auto-start Management → Toggle ON;

Or Settings → Battery → DChat → Startup Management → Manually enable all options.

(Note: Text labels vary across device brands; the target of configuration is to enable auto-start and background running for DChat.)

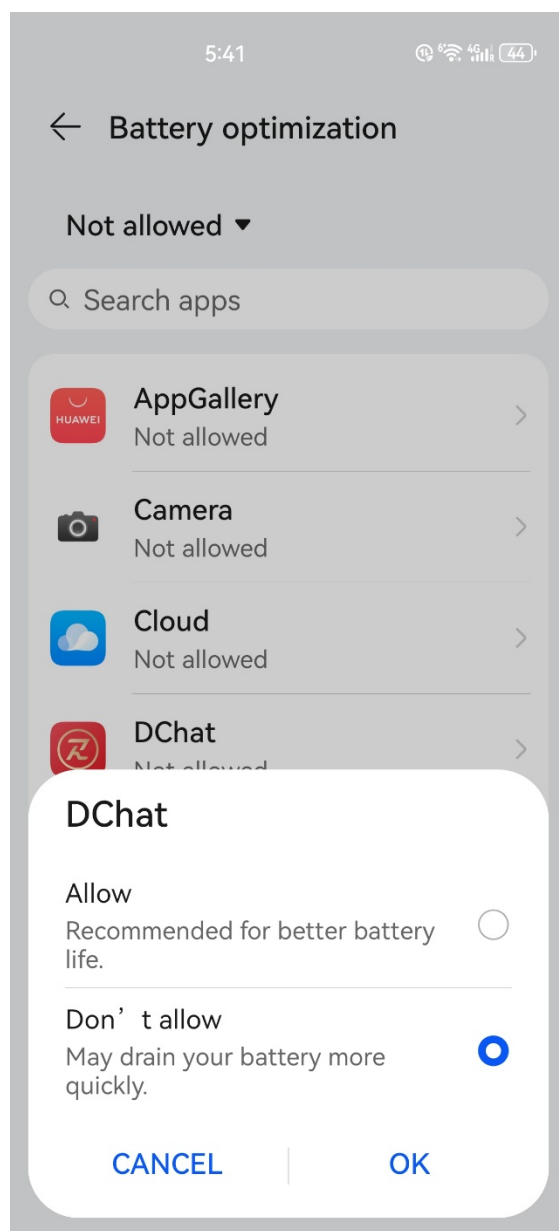

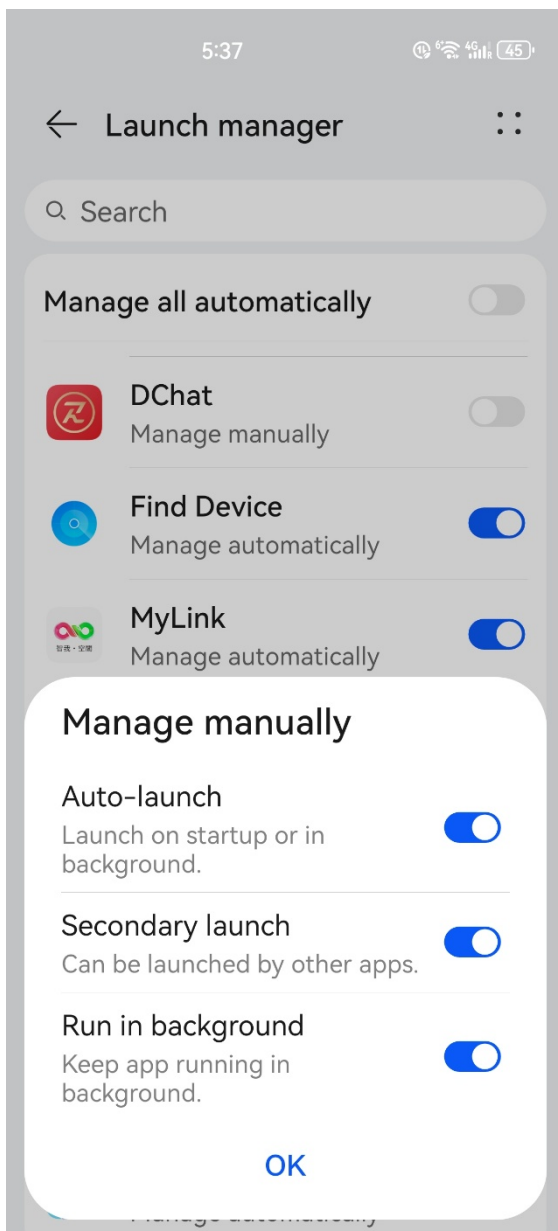

3.3 Special Permissions (For Partial Devices)

1. Ignore Battery Optimization: Stabilize background operation.

Path: Settings → Battery → Battery Optimization → DChat → Set to Not Optimized

2. Security Center Whitelist: Add DChat to trusted list to avoid interception and forced shutdown by security software.

Path: Phone Manager → Virus Scan → Quarantine → Add Trusted App, or disable risk warning labels.

4. Common Issues & Solutions

4.1 Installation Failure

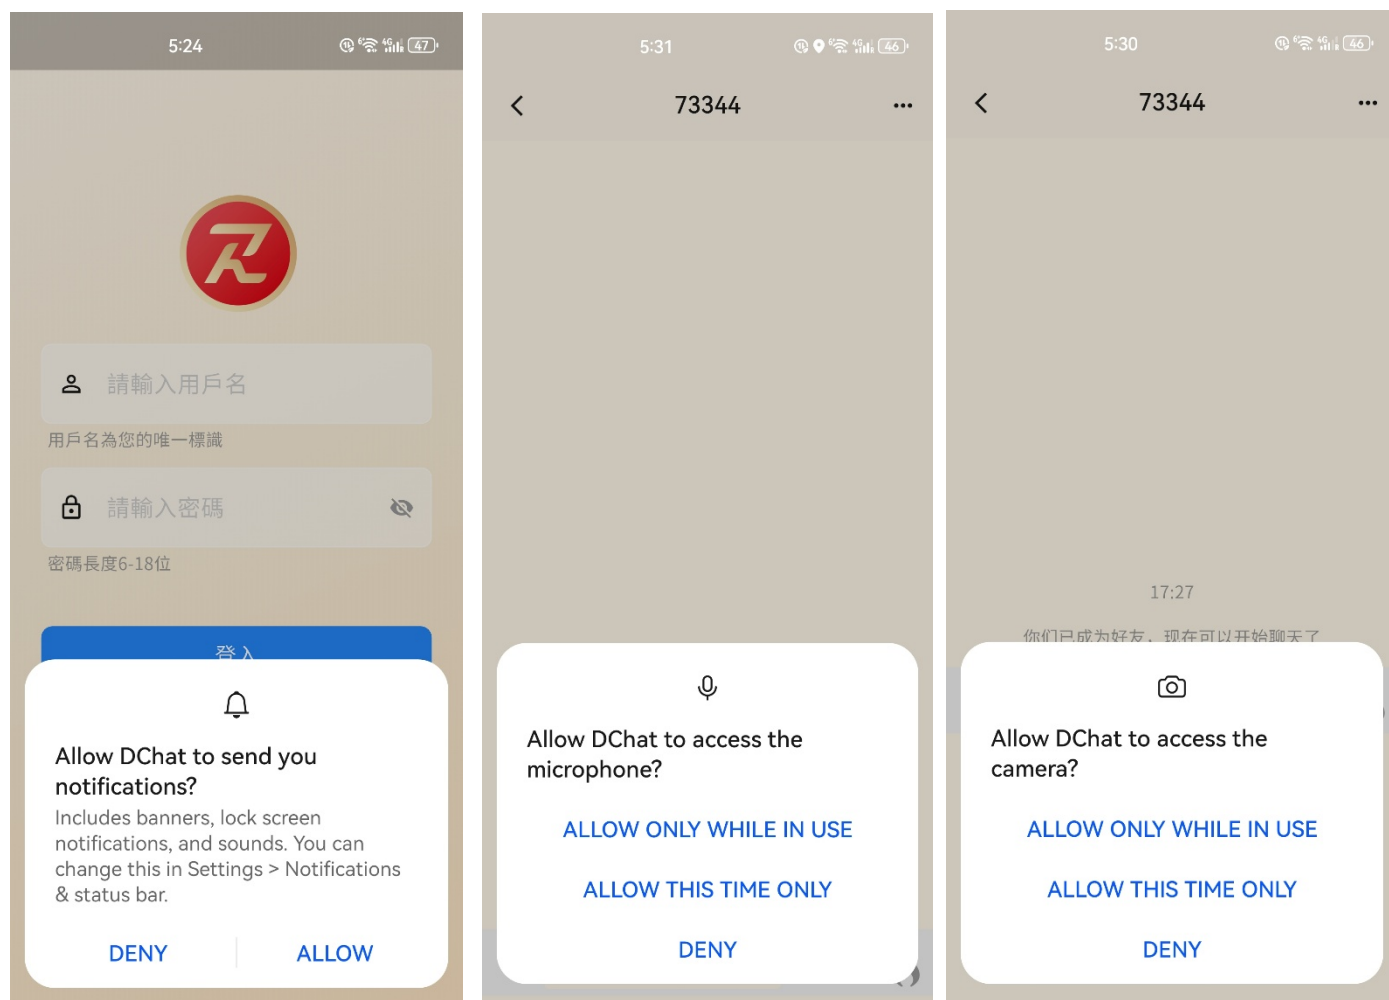

- "Insufficient Storage": Clear mobile cache or uninstall unused apps to free storage space.
- "Parse Error": Re-download DChat APK file with stable network.
- "Insufficient Permissions": Check if "Install Unknown Apps" permission is fully enabled.

4.2 Malfunctioning Features

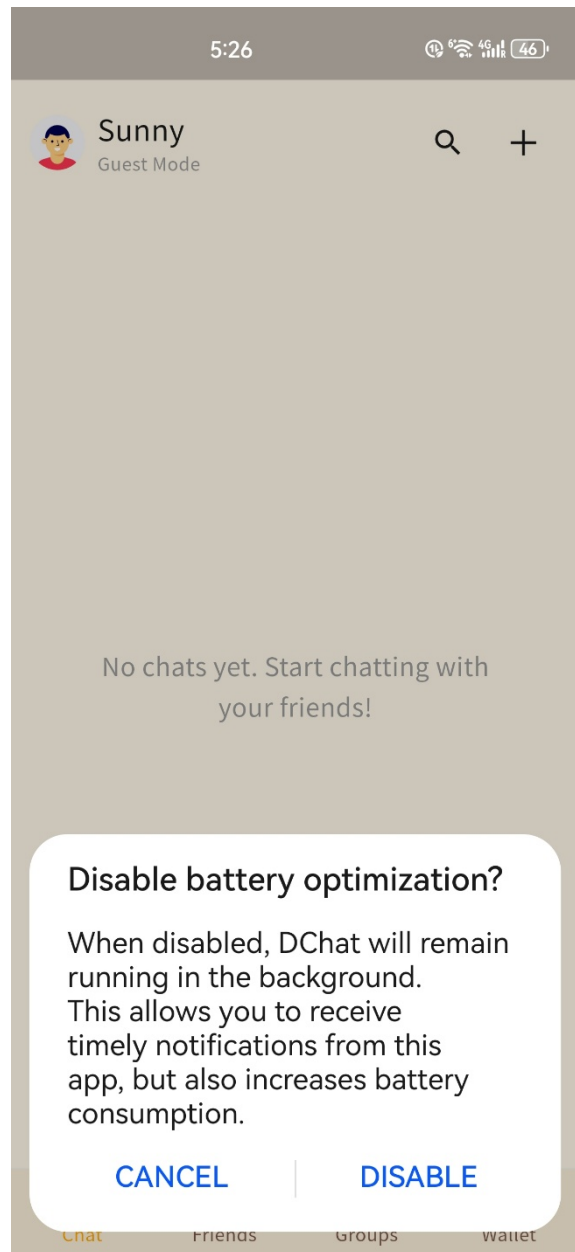

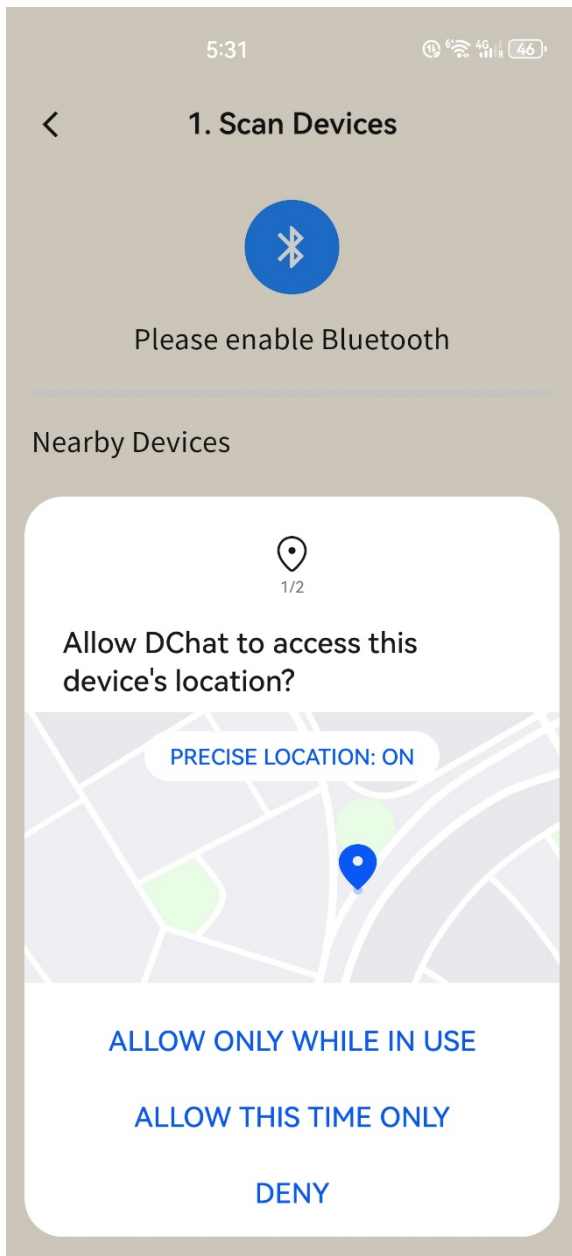

- Failed to send files: Confirm Storage permission is enabled.
- Voice call disconnection: Reconfigure background activity permission and add DChat to battery optimization whitelist.
- Delayed message reception: Enable notification permission and allow background running.
- Message sync error: The prompt "Poor network connection" means congestion on cloud server connection; close and restart the app or try later.

4.3 Interception by System Security Software

If the app is blocked repeatedly by security center, go to mobile Settings and disable the "App Installation Detection" function.

Supplement: During app usage, pop-up windows will request permissions for camera, microphone, notification, location, battery optimization, etc. Select "Allow" for all prompts. If you accidentally deny a permission, enable it manually following the paths in Chapter 3.

5. Problem Feedback Channel

If you encounter any abnormalities during use, open DChat APP → Settings → About DChat → Help & Feedback to submit issues for development team optimization.

6. Security Statement

This software version has passed complete code security audit, contains no malicious code and poses no risk of private data leakage.
